

A background image showing a handgun in a protective case with a key. The handgun is silver and black, and the case is black with a keyhole. The key is silver and has a logo on it. The background is a light gray.

Dear Member

We are excited to offer you an opportunity to purchase the Pangolin 180 Vehicle Handgun Safe at a greatly reduced price.

Pangolin has made available 18 units to our members at R 4 100.00 each (VAT inclusive).

Does it comply with Regulatory Standards?

Yes

The Pangolin H handgun safe has been independently tested and verified to satisfy the requirements of the South African standard SANS 953-1:2018 Storage of firearms and ammunition. Part 1 – Safes. Type B2 (general use) and Type B3 (temporary storage of firearms in motor vehicles and caravans).

NB: Firearm regulations require a certificate of installation by a professional installer with prescribed details.

Can I be found negligent, if my vehicle and / or safe is stolen, with my firearm locked in it?

No

If the safe was installed by a professional installer and you have the certificate of installation, you have complied with the safe regulations as per legislation.

What is the Pangolin Safe?

Providing a very high level of protection against theft of handguns from motor vehicles whilst travelling or during unattended parking.

There are two types of handgun safes:

One for permanent installation (Fixed) – This does not mean that you have to leave this safe in the vehicle when you sell it, you may transfer the safe to the new vehicle.

And the other removable (Docked). - The patent pending

Can be mechanically secured or detached from a vehicle in a few seconds.

It is sufficiently portable and comfortable to handle as to be easily carried from one location to another.

The design and components are exceptionally resistant to lock picking, lock breaking, physical penetration and removal of the safe from its mounting in the vehicle or other location.
