Upload the relevant scanned target per participation category on that submission page. Each score of each target entered, must be entered separately. If you enter 12 targets you must make 12 individual entries please (***please scan only the relevant target to attach to each score entry***). Exception is the semi-auto competition exercises, which each has a set of three documents to upload (see paragraphs 6 and 12 below for detail).

All submissions of competition targets and scores must comply with the prescripts of the [NHSA Postal Target Shooting Policy](#) and must be uploaded at the very latest on **23:59 on 2 October 2019**. At 00:00 on 3 October 2019 the link to the 2019 competition on members' Natshoot Member Pages will be deactivated.

**Note:** Targets must preferably be scanned in PDF format. When scanned in JPEG format the file size must please not be larger than 6 Meg.

**No Faxed or Emailed scanned targets will be accepted under any circumstance.**

**Shooting days may be distributed over the whole period of the competition**

## **7. FIREARMS PERMITTED IN COMPETITION**

- 7.1 Participants may only use the Firearms they personally legally own – as the member has made the firearm to fit him/her as person (open sights or scoped).

- 8.2 Only the targets as are mentioned under 8.1 will be accepted for the 2019 competition - **no exemptions will be made** (using the wrong target leads to automatic self-disqualification from that competition category).
- 8.3 Targets for the 2019 National Competition will be available for downloading from 08:00 on 30 August 2019.
- 8.4 The targets to be downloaded are all in PDF format and are all A4 in size

The participant then has the opportunity to correctly fill out all fields on the Target(s). If the participant, however, does not Edit the Target(s) and make the corrections and re-submit the Target(s) before **23:59 on 2 October 2019**, the specific Target(s) will not count towards the Competition.
- 8.6 Each individual Target's scores for the 2019 competition must be entered separately, as a single and individual entry, on the member's Scores page of his/her Natshoot Member Page.
- 8.7 The final day for electronically submission of competition targets and scores on participant's Natshoot Member Page is **23:59 on 2 October 2019**.

## 9. FIRING POSITION(s)

- 9.1 Only the prescribed firing positions as indicated in the respective exercise description may be used.
- 9.2 Competitors with disabilities for whom it is too difficult to be accommodated in the above-mentioned shooting positions, may shoot as they can do best. Please inform the office of such issue when sending your targets and enrolment forms, so that we can also keep record of the situation.

## 10. PERMITTED SHOOTING RANGES: WITNESSES & TIME KEEPERS

- 10.1 Competitors in the NHSA Annual National Postal Target Shooting Competition **may shoot at any publicly recognised shooting range or NHSA recognised private range of the competitor's choice**. The shooting range must obviously conform to the requirements of the specific exercise that is being shot there (at least 10 metres for handguns and at least 100 meters for rifles).
- 10.2 A list of [NHSA Friendly Shooting Ranges](#) is available on the NHSA-website if members would wish to shoot at any of those ranges (it is not compulsory to use only these ranges).

- 10.3 **Ranges may not furnish competitors with competition targets.**
- 10.4 Competitors are required to pay the necessary shooting range fees as specified by the specific shooting range, or as specified by the range for each exercise.
- 10.5 **Witness & Time keeper** = a person from the shooting range staff or an accompanying NHSA member or a person who is busy shooting on the range, and who witnesses the shoot and/or is prepared to act as time keeper for those exercises which are shot against time - who is made aware of the rules for the specific exercise and who counter signs the competitor's target on the prescribed place while also being prepared to furnish his/her cell phone number for verification purposes if need arises.
- 10.6 **Video:** For **some indicated competition exercises (see paragraph 14 below)** it is required that the competitor make a video of the full exercise being shot which clearly shows the targets being shot at and the time on the timing device being used to time the shooting of the exercise. Smart phones can be used to make the video. This video must be kept for 3 months after the closing date of the competition and must be made available to the competition evaluators if so requested. If this video cannot be produced on request by returning Email, the competitor will automatically disqualify himself/herself from that specific section of the competition.

## 11. SCORING OF TARGETS

- 11.1 The target is defined as the entire A4 card or A4 paper on which the scoring rings are printed but shall not include the backing against which the A4 target is pasted.
- 11.2 The X-ring on targets = 10 points
- 11.3 **CLEAN / PURE-Shot** (indicated as Pure-shot on Target): A shot, of which the hole does not cut any line of a scoring ring - see examples indicated on Target on page 8. Also see that the hole of lead-edged shots must also clearly be inside the scoring ring. A lead-edged shot of which the lead edge just touches the line but the hole is inside the scoring ring, is scored according to the number of the scoring ring it is shot into (see the lead-edged shots on Target on page 8).
- 11.4 **CUT-Shot:** A shot of which the hole clearly crosses the line of a scoring ring is calculated as the higher score number. A shot of which only 1% crosses the line of a scoring ring, and of which 99% of the shot is inside the scoring ring, is not a Pure-shot and is indicated as a cut shot, and counts the higher number (see examples on Target on page 8).
- 11.5 In case of key-holed, tipped shots, or skid shots, the higher value is awarded as per the explanation of cut-shot above - even though the hole might be elongated to the bullet's length rather than being a circle of the bullet's diameter.
- 11.6 When a bullet enters a target from the back of the target, it will be scored as a miss – thus count zero.
- 11.7 Hits on the outside of all the scoring rings are scored as misses – thus count zero.
